Introduction to EduPool

EduPool: Learning Management System

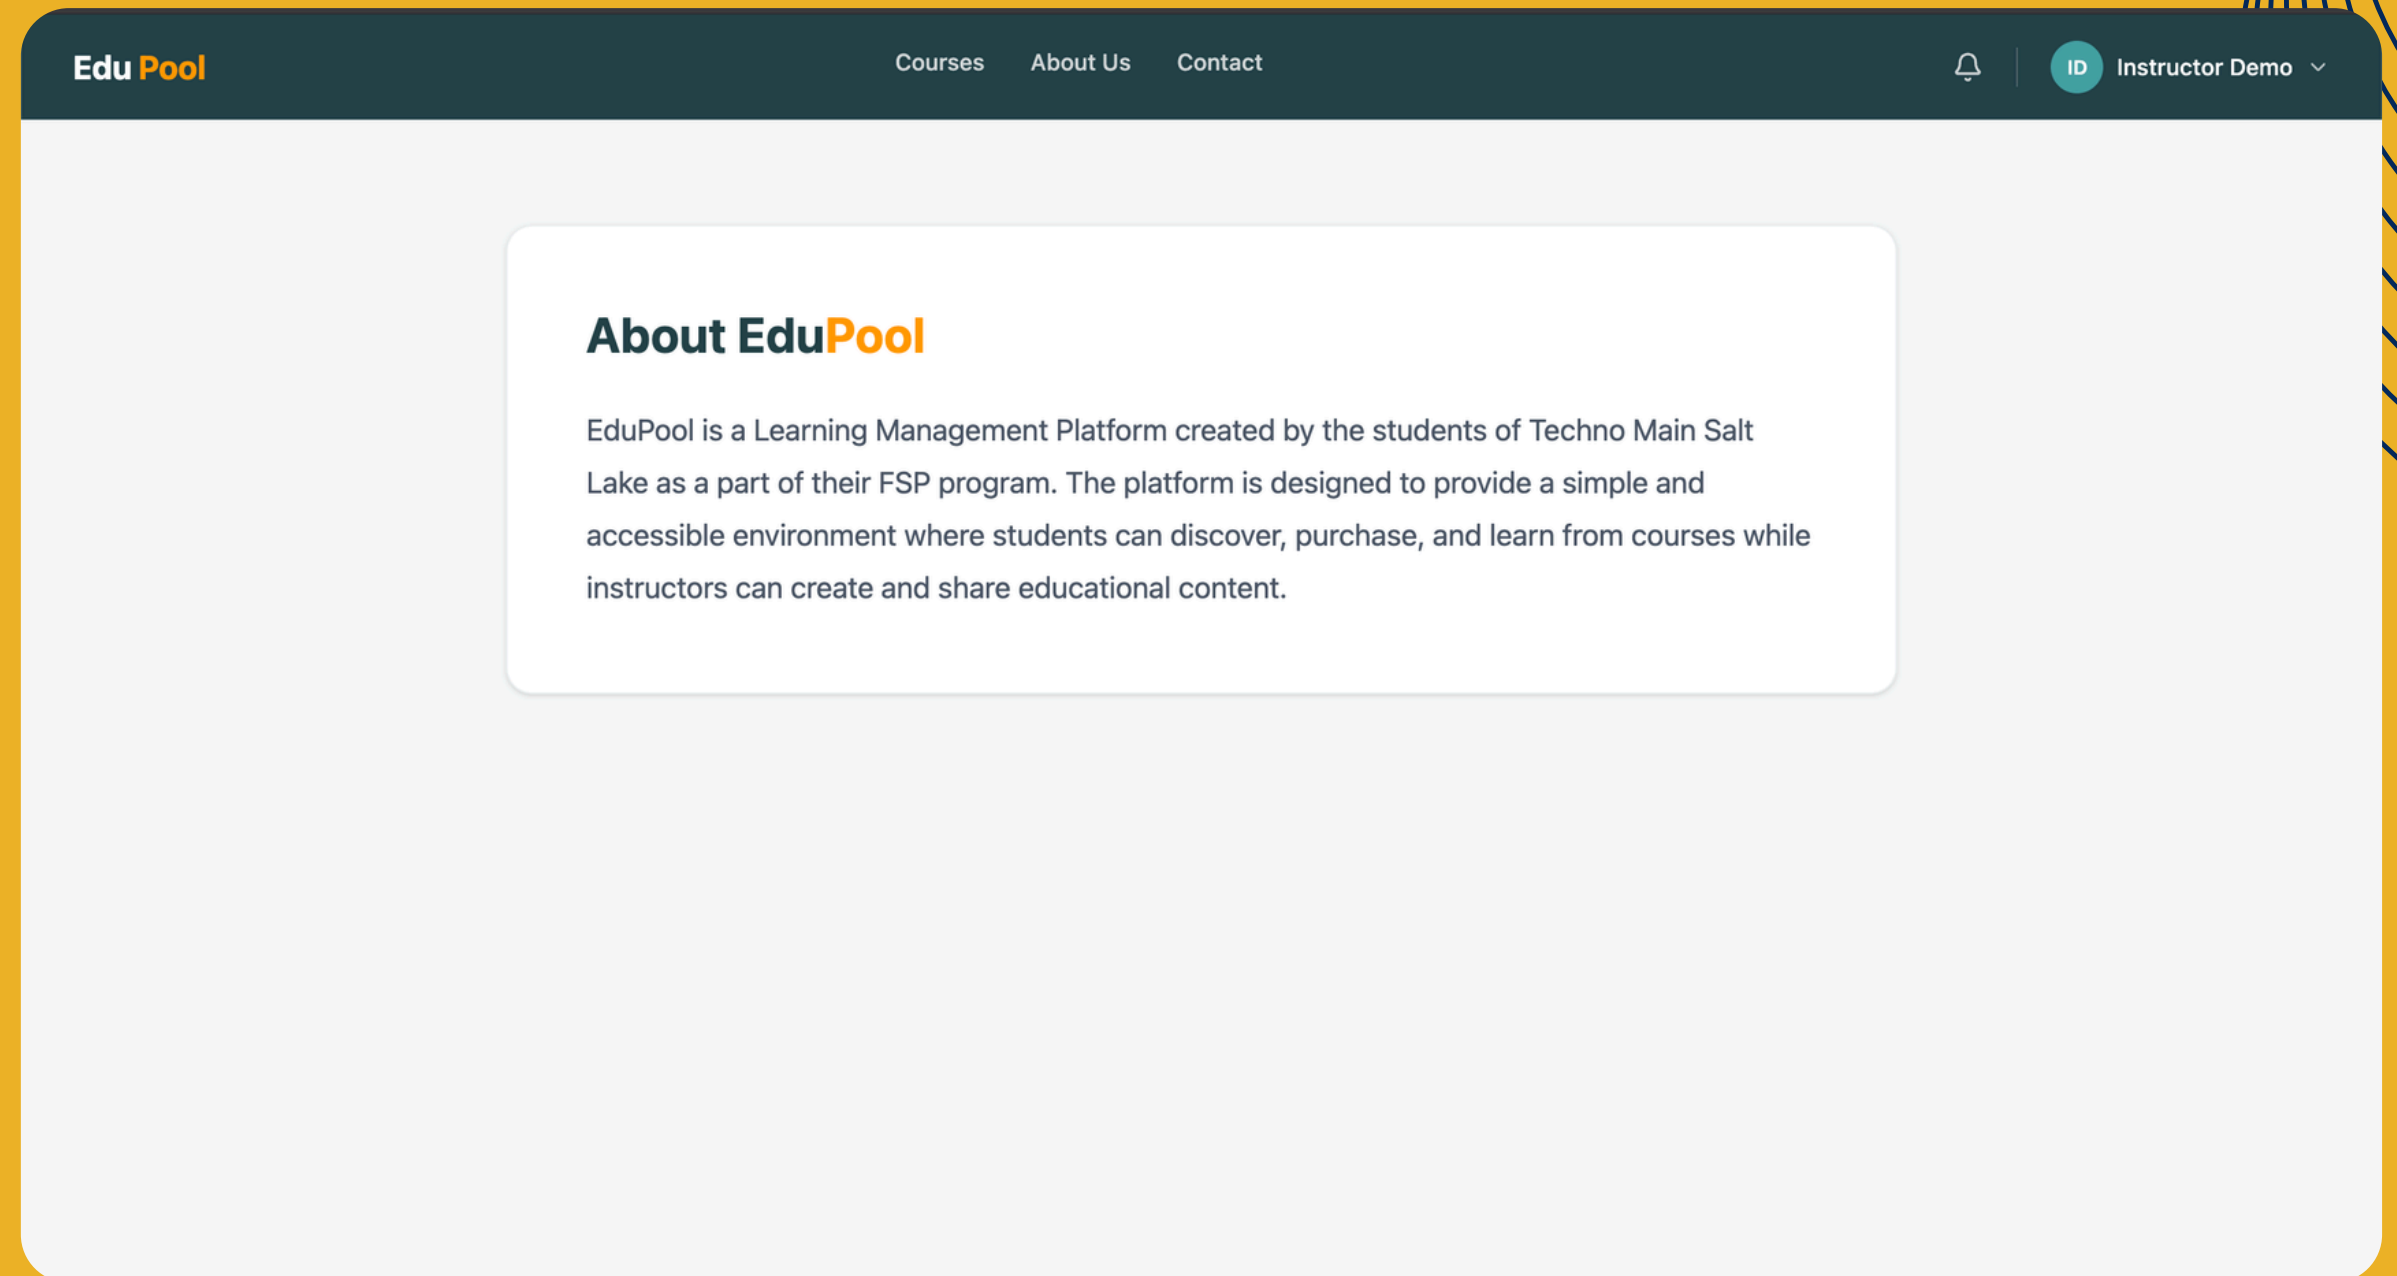

Project Overview

EduPool addresses educational gaps by providing a user-friendly platform that enhances **learning experiences** for both students and instructors.

Objectives & User Roles in EduPool

Empowering Users Through Role-Based Access

EduPool provides tailored experiences for students and instructors.

EduPool streamlines the learning experience by integrating **authentication**, course management, and student engagement into a cohesive platform, ensuring a smooth journey from enrollment to completion.

Technology Stack

EduPool - Tech Stack

BACKEND

Spring Boot

Spring Security
(Session-based)

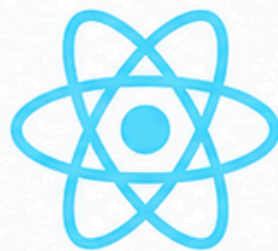

MySQL

Hibernate / JPA

FRONTEND

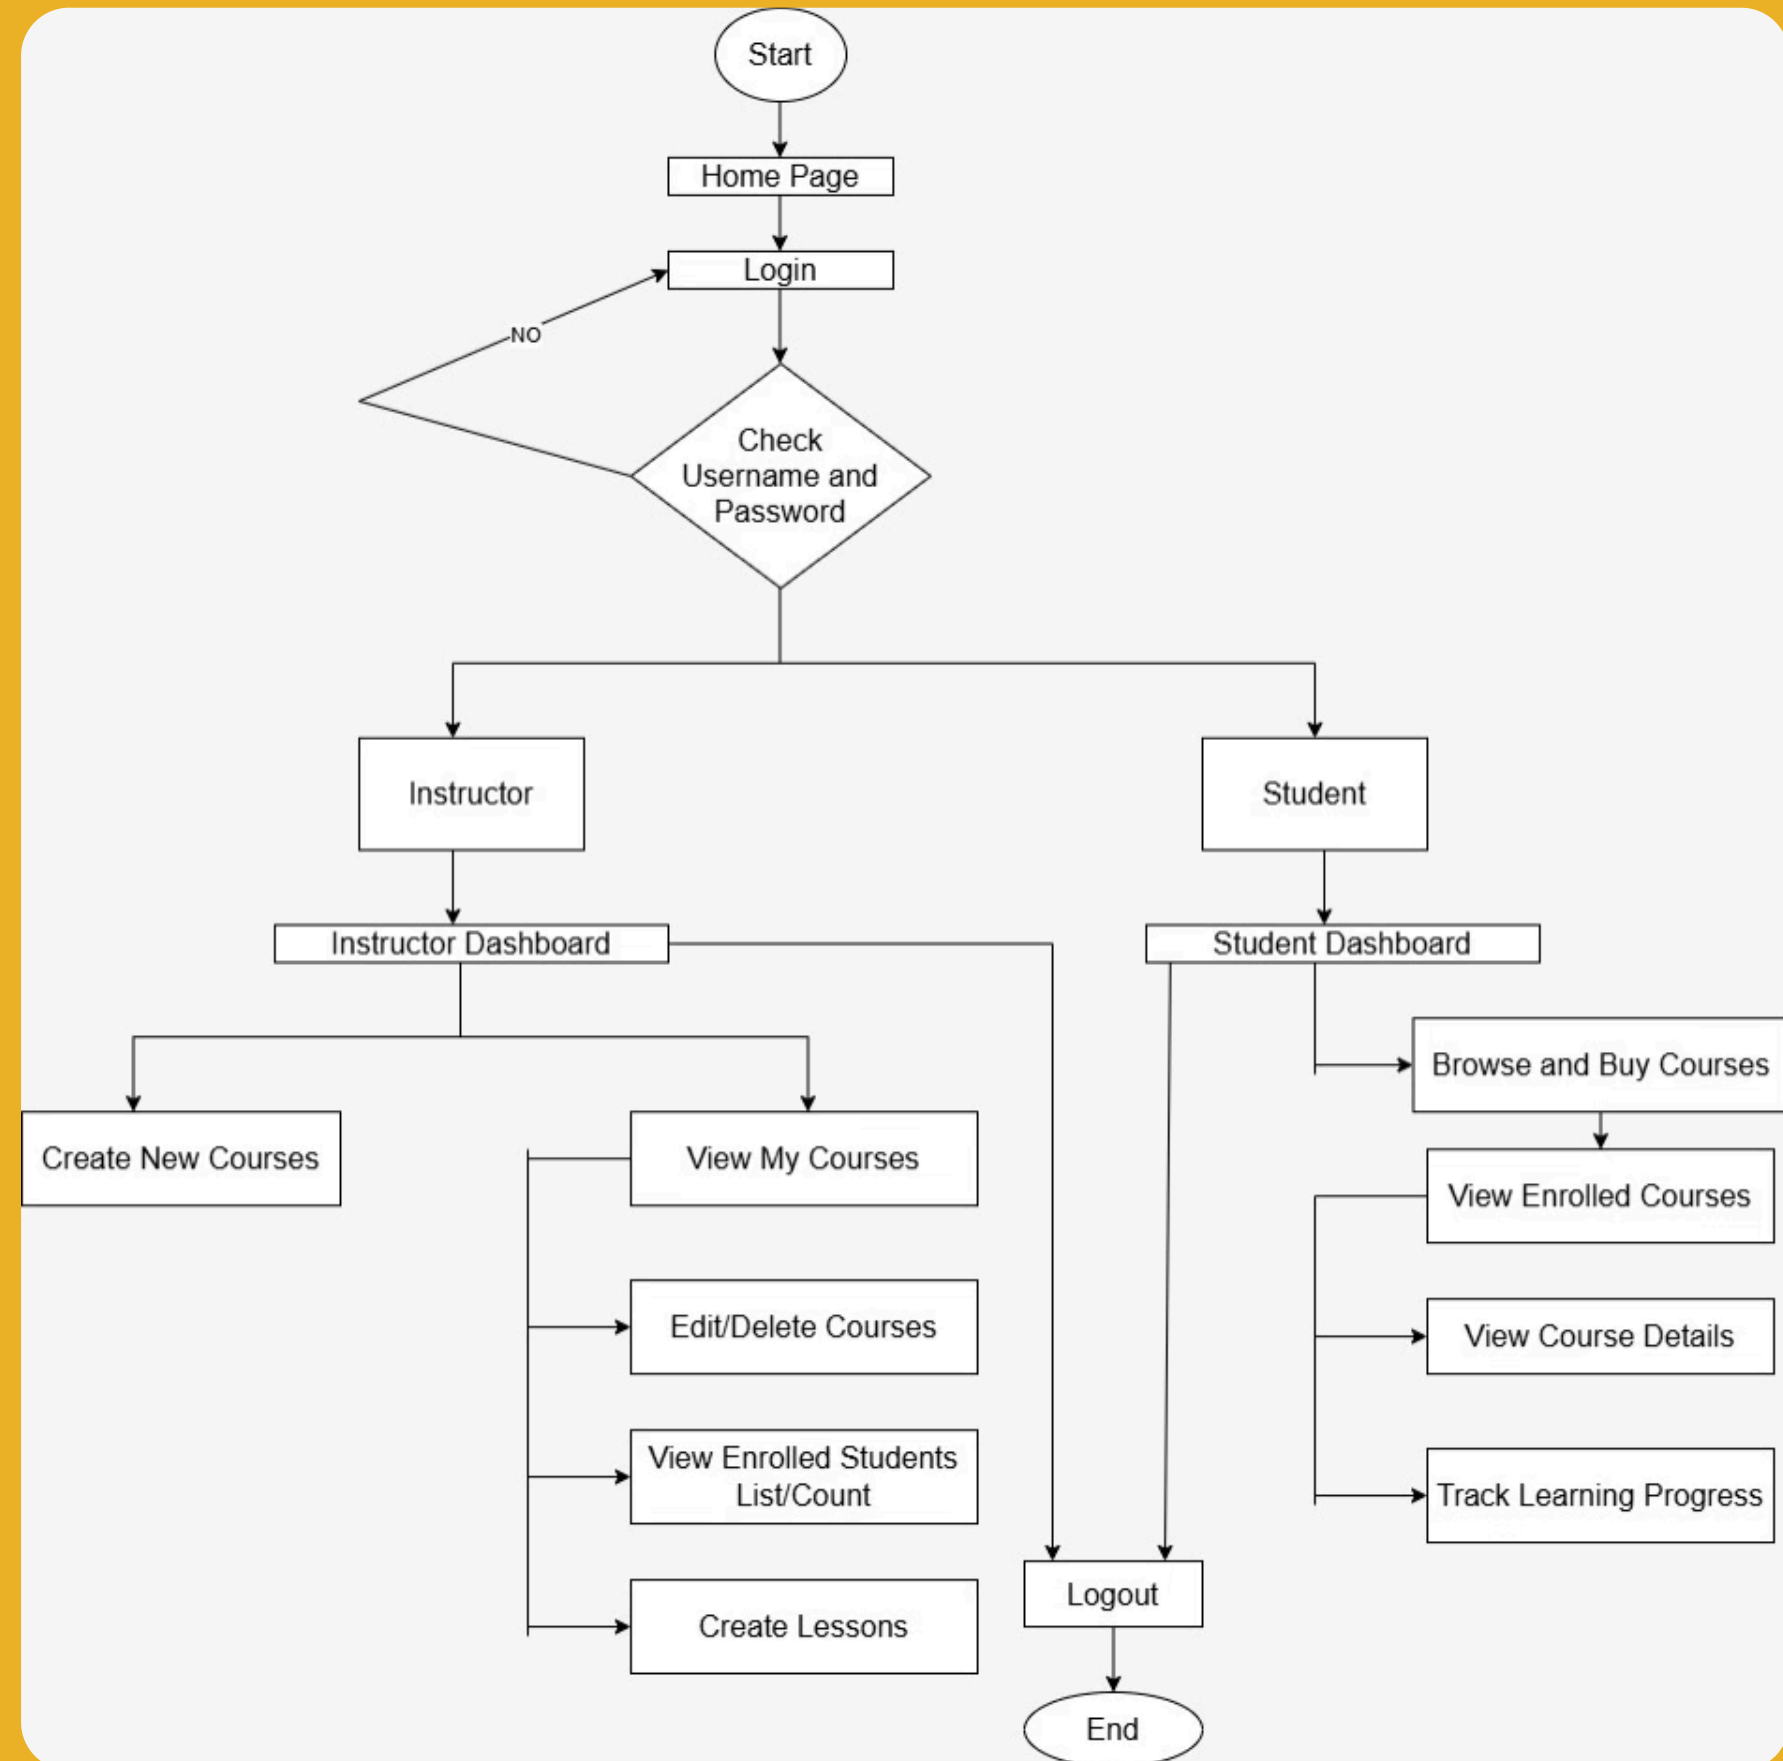

ReactJS

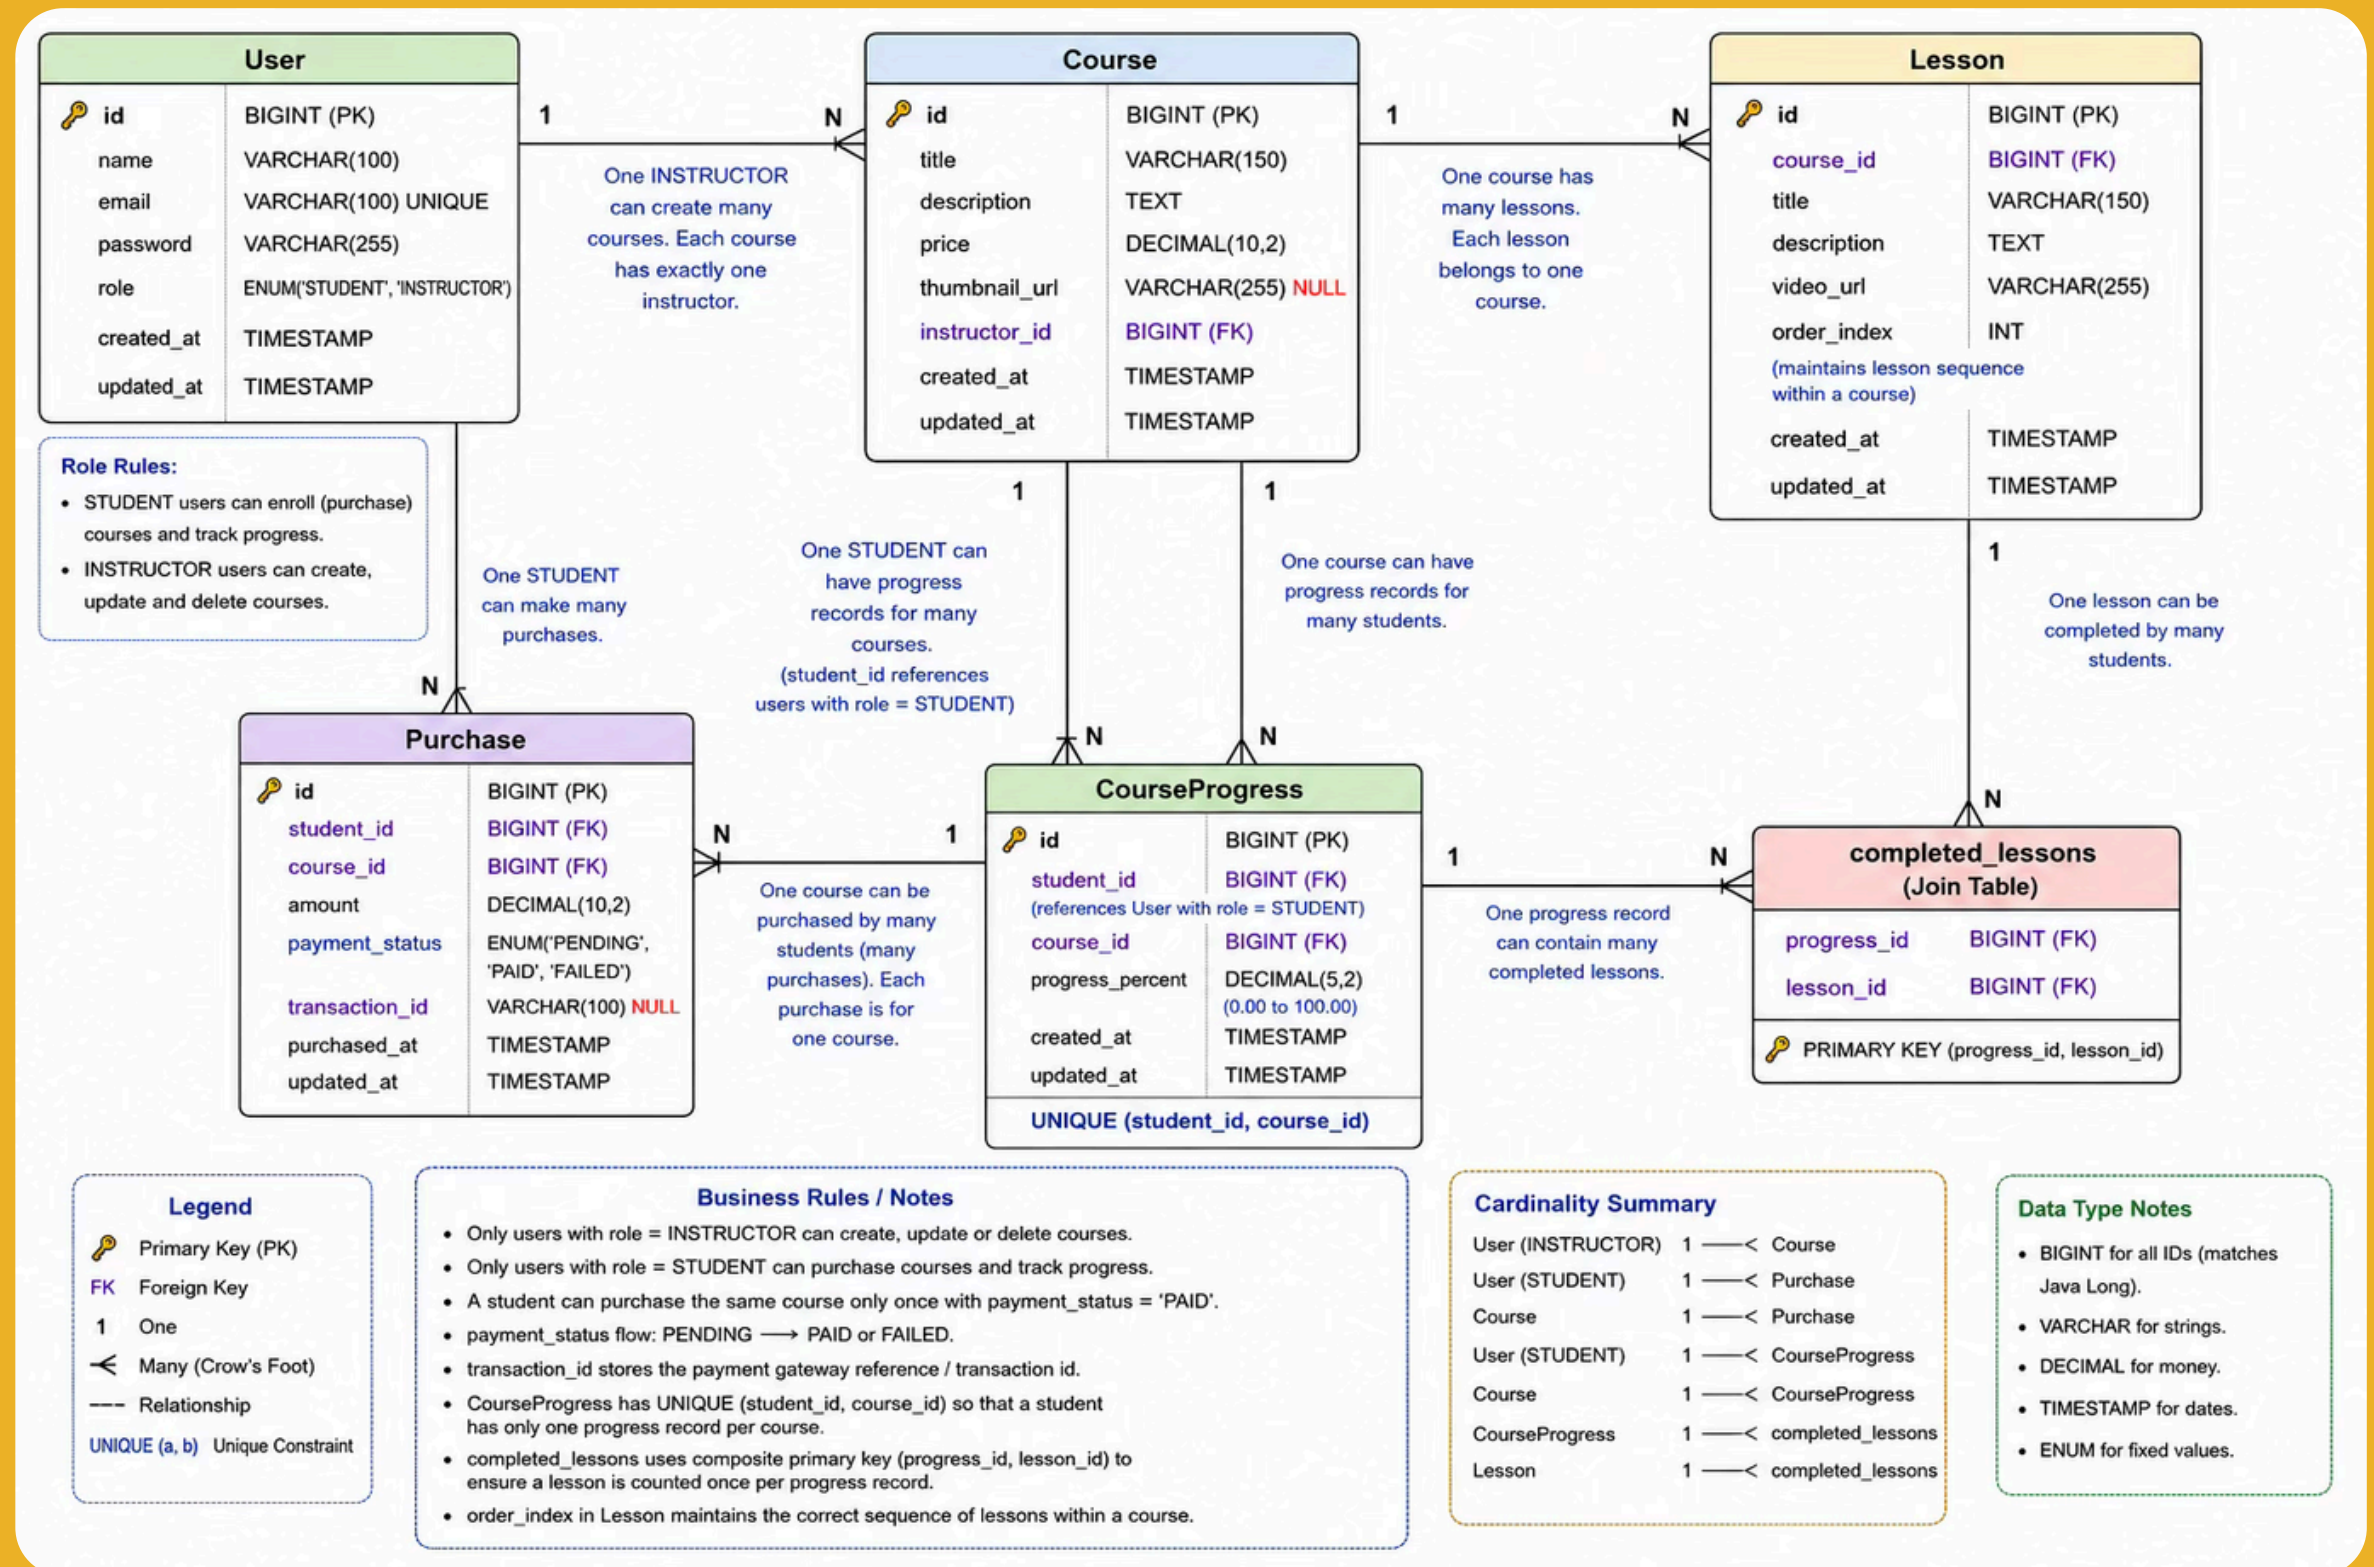

Tailwind CSS

System Architecture Overview

Backend & Database Design

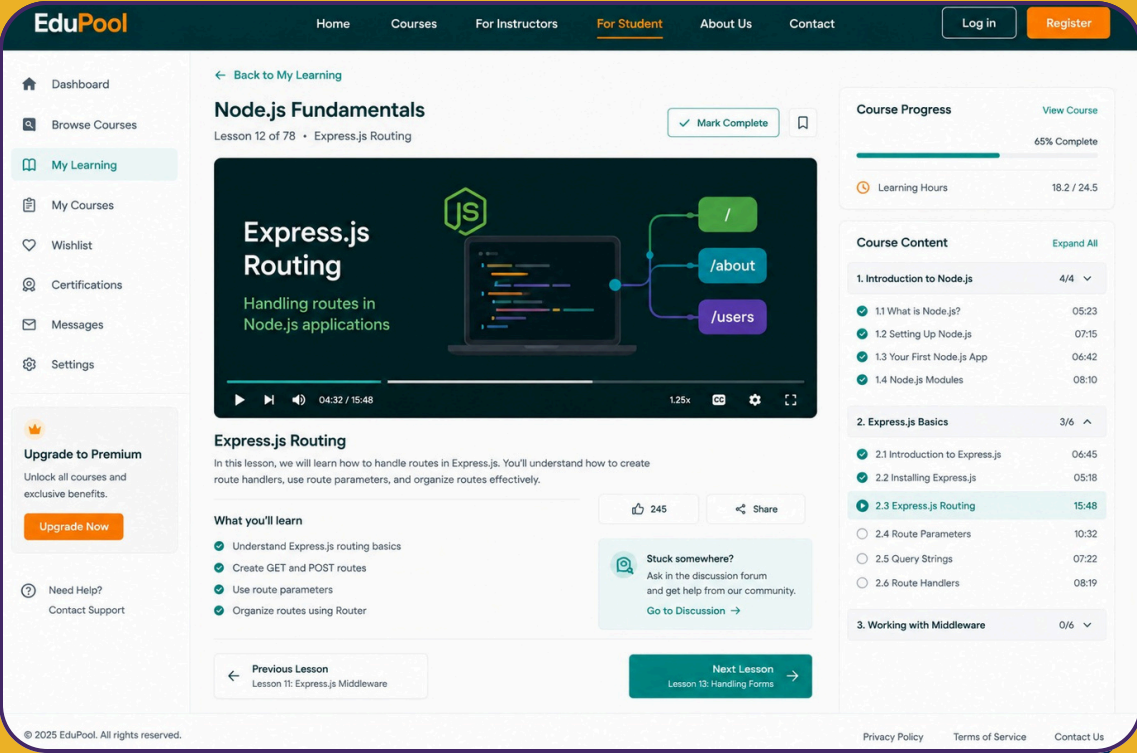

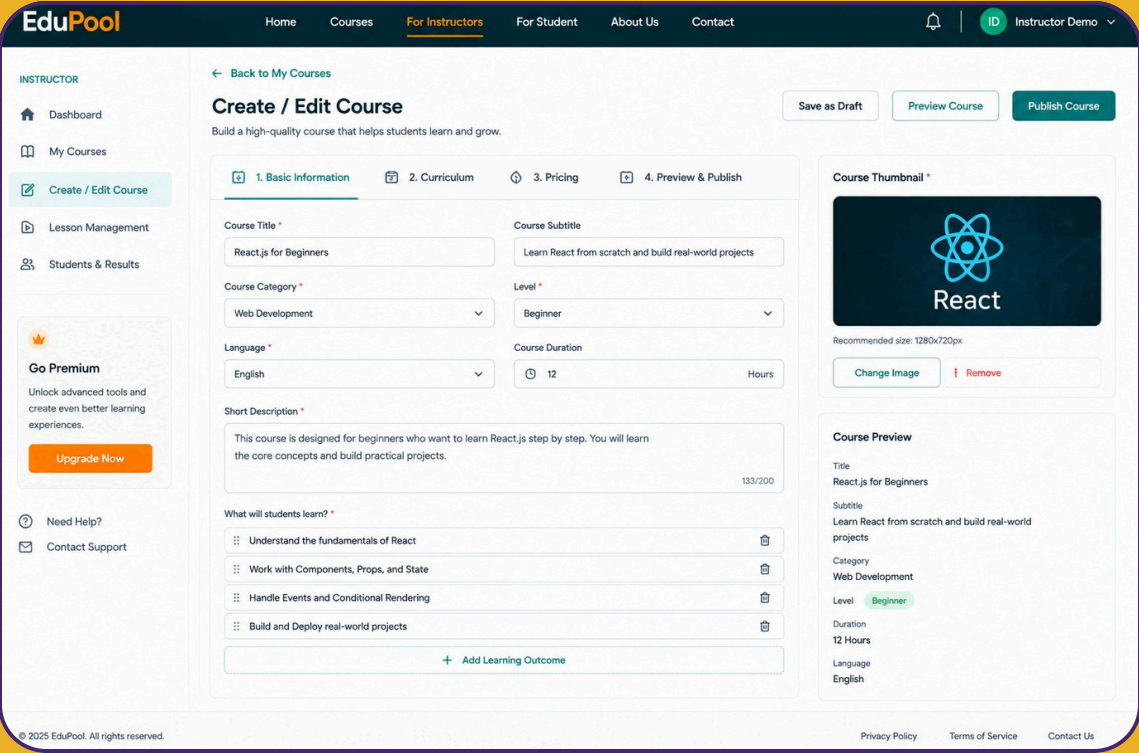

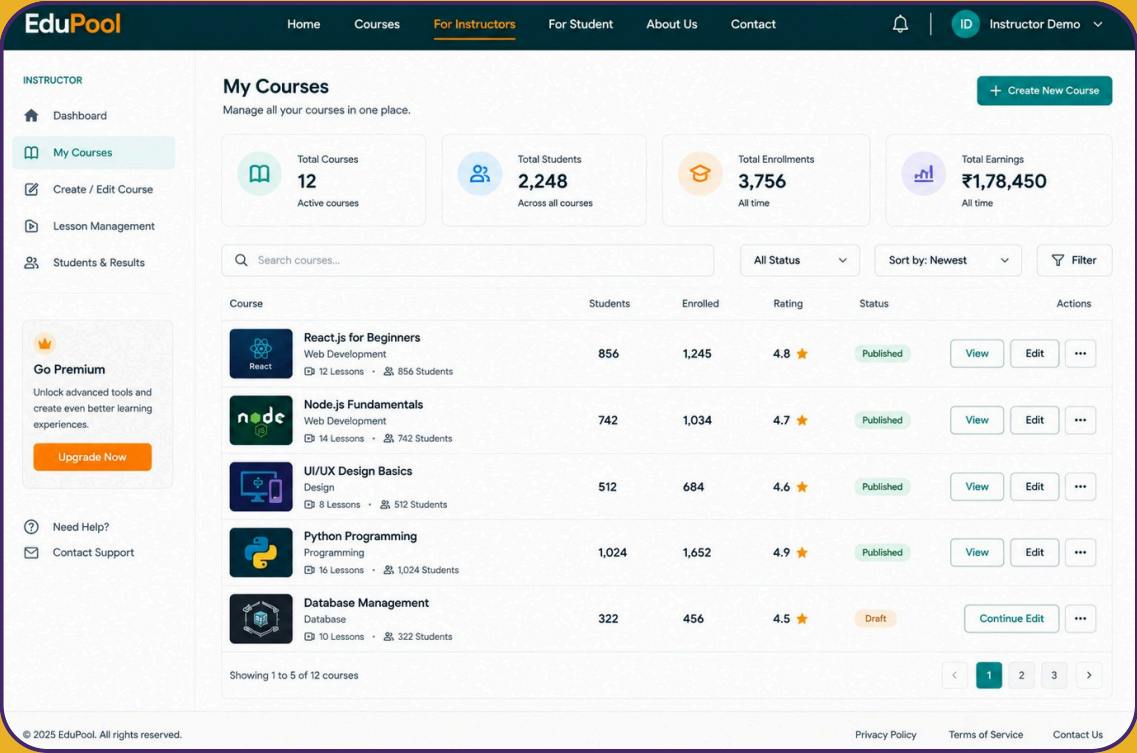

The **controller/service/repository** layering enhances maintainability and scalability, ensuring seamless API organization and efficient session management.

Frontend User Interface

A glimpse into EduPool's design

The design focuses on **usability** and **efficiency**, providing intuitive navigation for both students and instructors to enhance the learning experience.

Limitations & Security

Addressing Current Challenges and Concerns

The demo lacks features like payment gateways and password encryption. These limitations highlight future needs for a robust production-ready system with enhanced security measures.

Future Enhancements
